

EMT175460H

SIDE DISCHARGE TRACTOR

(MADE IN USA)

The Murray side discharge tractors with foot operated hydrostatic automatic transmission will make mowing fun. With 3 cutting blades and a cutting width of 46" / 117 cm they are ideal for the larger garden. A large side deflector disperses the grass evenly. These two tractors, equipped with the hydrostatic transmission and larger cutting decks, offer the mulching kit as a standard feature. Conversion from side discharge to mulching is quick and easy. All tractors have a wide leg space and can be easily accessed. The height control is mounted on the fender and can be reached comfortably.

Easy to turn independent steering

Easy to use foot pedal for automatic transmission

Step-through design allows for easy on and off

Comfortable adjustable seats with back support

Easy to reach cutting height control

Large side discharge deflector with optional mulching or bagging
